IMPORTANT EVENT TO REPORT: Additional information about signing of Letter of Intent for electrolyte production

Sinteza SA informs investors that yesterday, 20.11.2024, a Letter of Intent was signed with the American company LOCKHEED MARTIN, for the production of electrolyte. This electrolyte is the basic element in the Grid Star Flow battery component. Batteries of this type help reduce carbon emissions and accelerate the transition to clean energy.

The agreement concluded establishes the framework in which the parties will begin the development process of a future factory worth 50 million euros, which will produce 30,000 tons of negative electrolyte per year, starting in the summer of 2026. This will be the first European factory of this type and the largest in the world.

This agreement follows the recent success of Sinteza in securing a €25 million National Recovery and Resilience Plan (NRRP) co-financing funds for the electrolyte that is used in GridStar® Flow large-scale batteries.
